CALL FOR PARTICIPANTS: The use of technology in the home for monitoring health and wellbeing

Do you have experience caring for or living with people with conditions such as Multiple Sclerosis or who have had a stroke?

If so, we’d love you to take part in one of our workshops.

Our project explores attitudes towards the use of technology to monitor and manage health and wellbeing in the home.

In the workshops we will discuss how you use (or do not use) technology to support the health and wellbeing of others, and how you may do so in the future.

You will not be asked to discuss anyone’s medical history, and you are under no obligation to disclose any information you do not want to.

Workshops will last around 2 hours and take place online. You will receive a £20 shopping voucher for contributing to the study.

Workshops will take place in October and November 2021, to be confirmed based on participant availability.

To sign up, or for more information, contact Dr Liz Dowthwaite liz.dowthwaite@nottingham.ac.uk with an indication of your availability.

You must be over 18 to take part.
